

HR Employee Attrition Dashboard

KEY INSIGHTS

- **1,470 employees** were analyzed, with **237 employees leaving**, resulting in a **16% attrition rate**.
- **Male employees had a higher attrition rate (17%)** than females (15%).
- Employees working **overtime had a much higher attrition rate (31%)** than those who did not (10%).
- **Sales had the highest departmental attrition rate (21%)**, followed by Human Resources (19%).
- **Bad work-life balance had the highest attrition rate (31%)**, while **low job satisfaction** was associated with a **23%** attrition rate.

RECOMMENDATIONS

- **Review overtime and workloads** to identify factors contributing to the **31%** attrition rate.
- **Improve work-life balance** through workload management and flexible working arrangements.
- **Investigate employee job satisfaction**, particularly among employees reporting low satisfaction.
- **Focus on the Sales department** to identify and address factors contributing to its higher attrition rate.
- **Further analyze gender differences** by examining factors such as overtime, job role, satisfaction, and income.
